The Managing Director  
Gambus Energy Beta Limited  
2b Oshineye St, Pedro  
Lagos  
**Attention: Mr. A. Olaitan**

Dear Sir,

**INSTALLATION OF FUEL MONITORING SYSTEM**

Today marks three weeks after the installation of the fuel monitoring system.

Since installation three weeks ago, we have used a total of 1,200 liters of fuel versus an average of 1,000 liters weekly that we have used over the last 6 months! As a result of the system, we were able to detect unauthorized siphoning of fuel from the generator that had been designed to look as if the generator was being used, since we were aware from the generator logs that no generator was on. From the system, we were able to pinpoint the loss to a 30 minute window, which enabled us to replay the CCTV system to detect the "security" man that had stolen the fuel!

We will continue to fine tune the system and plan to use it as the basis for paying for fuel purchases as we are now able to determine precisely how much fuel is actually supplied to us.

Thank you for your services.
